

**Prealgebra, Math Course 1 Bridge, SE Math Course 1
(the “Math Pods”)**

Ms. Poehler, Mr. Korp, Mr. Menard

At-Home Learning for Thursday, 3/19, to Friday, 4/3

Your to-do list for math is simple:

1. Check your email for instructions from your teacher starting Thursday
2. Do the activities assigned by your teacher
3. If you need some tutoring or run into any problems email your teacher

The weeks during which we are “sheltering-in-place” to slow the spread of the novel coronavirus are an opportunity for us to:

1. Review and reinforce skills covered earlier this year
2. Continue developing in current skill areas
3. Connect via email and/or Google meet for instruction, if needed

-
- During the second semester we have been able to provide more individual assignments based upon each of your areas of strength and growth. As such, each student will be receiving individual instructions by email from their teacher.
 - Individual work will usually take about 20-30 minutes or more a day and will often include one or more of the following:
 - exercises at ixl.com and other sites to practice,
 - paper activities to print and do (for students who can print at home)
 - Class appointments can be arranged through email. At the beginning of each of your appointments an invitation to a video conference will be emailed to you. You will then meet with your teacher to check in, go over content, and/or answer questions.

Take care, and see you online!
